Subject: FW: Can the contract work be done at any site?

Gary, Here's the original request from TCEQ for F.J. Doyle Salvage. I'll send you the follow up email to this.

Rick, Ellie Wehner has a site which may be a good candidate. It would involve doing a removal action of PCB contaminated soils, installation of a monitor well to determine if there is GW contamination and a drinking water survey since there is a public water supply well within 1500 feet or so. Let me know what you think. I can forward you more info once I get it. Thanks, Allan

Thanks. Can it be used for vapor intrusion assessment?
